SUMMARY

Aspiring AI engineer with a strong foundation in full-stack development, database management, and systems programming, seeking to leverage practical experience in building and deploying robust applications.

WORK EXPERIENCE

Full-Stack Developer (FastAPI), Tourboard / E-Kalite - 1.5 Month (Mandatory Intern.) 2025

Developed backend services using FastAPI

- Designed database operations and API endpoints
- Implemented frontend data flow and error handling processes
- Gained experience in corporate Git workflows and project development processes

Full-Stack Developer Intern (Polgen & Sentebiolab-Biomedical Company) - (5 Month) 2024

Developed and delivered a fully functional e-commerce web application

- Worked on backend-frontend integration and API development
- Conducted system testing and bug validation scenarios
- Prepared the system for production with real user data

Freelance Designer & No-Code Web Developer 2019-2022

- Designed logos and user interfaces
- Built promotional websites using no-code platforms

Academic Projects

xv6 Kernel Development (Operating Systems Project) 2025

Improved process management and system calls

- Performed kernel debugging and low-level C programming
- Analyzed scheduler behavior

University Management System – Database Project (Group) 2025

Designed ER diagrams and converted them into relational models

- Integrated database, backend, and user interface
- Prepared 140+ pages of technical documentation

Checkstyle Refactoring (Design Patterns Project) 2025

- Performed refactoring on an open-source project
- Improved code structure using design patterns
- Developed static analysis rules

Certifications & Additional Work

Leeds University Coding Institute - Programming Fundamentals 2021

- King's College London - Engineering Skills & Teamwork 2021
- Patent Development Project (Obtained patent ownership rights) (2020–2021)
- eTwinning Technology Project 2019

SKILLS

Working

- C
- C++
- CSS
- FastAPI
- Git
- GitHub
- HTML
- Java
- JavaScript
- Linux
- Next.js
- Node.js
- PostgreSQL
- Python
- React
- SQL
- Tailwind
- Teamwork

EDUCATION

Ankara Yildirim Beyazit Universitesi / Ankara ,Türkiye 2027 /Expected Graduation GPA : 3.47 Uluslararası Prof.Dr. Muhammed Hamidullah Anadolu İmam Hatip Lisesi / Ankara ,Türkiye 2022 Grade: %96.5

Programming Languages: Python, Java, C, C++, JavaScript

- Backend : FastAPI, Node.js
- Frontend : React, Next.js, HTML, CSS, Tailwind
- Databases : SQL,Postgresql, (ER Modeling, Mapping, Normalization ,DB design system)
- Systems : Linux, xv6 Kernel
- Design Tools : Adobe Photoshop, Adobe Illustrator , Lightroom, Premiere, Affinity Designer

LANGUAGES

- Arabic : Native (Fluent) • Turkish : Advanced • English : Advanced
